Jingxuan Liu

Atlanta, GA |jingxuanliu317@gmail.com | 803-508-4849 |www.linkedin.com/in/jing-xuan-liu |https://jingxuanliu1.github.io/Portfolio

EDUCATION

Georgia Institute of Technology (GT), Atlanta, GA May 2027

Bachelor of Science in Computer Science, GPA: 3.53

Relevant Coursework: Discrete Math, Intro to Object-Oriented Programming, Data Structures and Algorithms, Design and Analysis of Algorithms, Computer Organization and Programming, Systems and Networks, Objects and Design, Machine Learning, Intro to Databases.

PROGRAMMING SKILLS

Proficient in **Java, Python, SQL**; Familiar with **C, Assembly, HTML, CSS, JavaScript, C++**

PROGRAMMING PROJECTS

Time Map — Full-Stack Task & Time Management App March 2025 – May 2025

- Collaborated with a team of five to design and develop a full-stack mobile website using Django and Python.
- Implemented back-end features, including user authentication and password management, with a MySQL database.
- Conducted unit and integration tests to ensure a bug-free user experience.

Movie Store — Cross-Platform Movie Purchasing App January 2025 – March 2025

- Developed a cross-platform movie purchasing app for mobile and desktop using Django and Python.
- Implemented secure user authentication and payment processing, ensuring compliance with security standards.
- Designed a MySQL database to manage movie catalogs and user transactions, supporting 100+ mock purchases during testing.

YouTube Engagement Prediction — Machine Learning Analysis & Prediction August 2025 – December 2025

- Built machine learning models to process 1M+ YouTube comments and video metadata.
- Engineered features from text and video attributes to capture patterns influencing engagement.
- Applied predictive models to identify key factors driving video popularity and user interaction.

TAAIB VCCPS Intelligence Platform — Backend & Model Engineering January 2026 – May 2026

- Built FastAPI backend in Python for an industrial vCPPS intelligence platform supporting real-time data processing.
- Developed telemetry pipelines and model orchestration for anomaly detection, forecasting, and predictive maintenance.
- Integrated InfluxDB and MongoDB for high-frequency data and validated system performance via end-to-end tests.

WORK EXPERIENCE

Handshake AI Fellowship August 2025 – current

- Provided detailed feedback on model outputs to guide ML model improvement.
- Evaluated model predictions, identified errors, and supplied corrective examples to improve quality and alignment.
- Contributed to training cycles by generating high-quality human judgments used to refine model performance.

LEADERSHIP & COMMUNITY INVOLVEMENT

Supercomputing @ GT, Member August 2024 – current

- Actively participate in weekly meetings to learn about high-performance computing.
- Engage in introductory coding workshops, applying knowledge of Java and algorithms to explore parallel computing techniques.

Artificial Intelligence @ GT, Member August 2024 – current

- Collaborate with peers on introductory AI projects, exploring applications like data preprocessing and model development.
- Implemented machine learning models in Python for a team project analyzing dataset patterns, improving prediction accuracy for a club competition.

Additional Skills and Interests

- **Languages:** Fluent in Chinese (Mandarin) and English
- **Interests:** Machine Learning, Cloud Computing, Algorithm Optimization, Web Development, Cybersecurity.
